Regulations on Maritime Medicine Requirements on Merchant Vessels

(Maritime Medicine Regulations)

Maritime Medicine Regulations of 14 August 2014 (Federal Law Gazette I p. 1383)

Chapter 1
General provisions

Section 1
Scope

These Regulations govern:

1. the determination of fitness for service at sea;
2. the authorization of physicians to conduct examinations of fitness for service at sea as well as the assurance of the quality of these examinations;
3. medical care on board of ships;
4. the accreditation of medical refresher courses; and
5. the registration of ships’ doctors.

The scope of the Regulations includes onshore matters where these are directly related to the areas referred to in paras. 1 to 5 of the first sentence.

Section 2
Definitions

For the purposes of these Regulations:

2. the STCW Convention is the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers of 7 July 1978 (Federal Law Gazette 1982 II, p. 297, 298), as amended;
3. the Occupational Accident Insurance Fund is the Occupational Accident Insurance Fund for Transport and Traffic;
4. the Maritime Medical Service is a working unit of the Occupational Accident Insurance Fund that is staffed with physicians carrying out maritime medical tasks.

Chapter 2
Fitness for service at sea

Subchapter 1
Requirements to be fulfilled by persons on board

Section 3
Fitness for service at sea requirements

The fitness for service at sea requirement in accordance with Section 11, also in conjunction with sentences 2 to 4 of Section 3(4) of the Maritime Labour Act, shall be considered satisfied if the person to be examined meets the health requirements laid down in Annex 1 for the department he or she wishes to work in.

Section 4
Conduct of the examination of fitness for service at sea

(1) The authorized physician shall conduct the examination of fitness for service at sea in his examination rooms, examining every person separately in accordance with the requirements of Annex 2. The person to be examined shall be asked about his or her state of health and previous diseases.
(2) The authorized physician or the physician of the Maritime Medical Service may consult another physician when conducting an examination or arrange for an additional examination if required for the assessment of the fitness for service at sea. The final assessment shall be made by the authorized physician or the physician of the Maritime Medical Service.

Section 5
Certificate of fitness for service at sea

(1) If the authorized physician or the physician of the Maritime Medical Service finds that a person is fit for service at sea, he or she shall:
   1. fill in the form of the certificate of fitness for service at sea completely and sign it;
   2. stamp the form with a stamp in accordance with the model provided in Annex 3; and
   3. give or transmit the certificate of fitness for service at sea to the examined person.

The examined person shall sign the certificate of fitness for service at sea.
(2) The holder of the certificate of fitness for service at sea shall keep the original of the certificate on board in accordance with the second and third sentences. The holder of the certificate of fitness for service at sea shall give it to the master for safekeeping when reporting for duty on board. The master shall hold the certificate of fitness for service at sea in safekeeping for the duration of the holder's service on the ship and shall return it to him or her upon the end of his or her service.

Section 6
Limitations of fitness for service at sea

The authorized physician or the physician of the Maritime Medical Service shall indicate limitations of fitness for service at sea, in particular regarding specific types of activity or specific trading areas or the duration of service on board, in the certificate of fitness for service at sea where required in the light of the examination results. Moreover, if the
prerequisites of the first sentence are met, conditions for the service on board may be indicated in the certificate of fitness for service at sea, in particular regarding:

1. the performance of activities in the presence of one or several other crew members; or
2. the wearing or use of glasses, contact lenses, hearing aids or other aids and the carrying of replacements for the aids.

Section 7
Denial of fitness for service at sea
If the examined person is not fit for service at sea, the authorized physician shall issue a confirmation indicating that no certificate of fitness for service at sea was issued and give or transmit this confirmation to the examined person.

Section 8
Board of Appeal
(1) Regarding the Board of Appeal that is to be established in accordance with Section 15(2) of the Maritime Labour Act, the shipowners’ and seafarers’ organisations are to submit to the Occupational Accident Insurance Fund lists of proposals with the names of experts for the appointment as assessors from the occupational groups specified in the first sentence of subsection 2. The Occupational Accident Insurance Fund shall select, in accordance with the first sentence of subsection 2, suitable persons from the lists and appoint them as members of the Board of Appeal for a period of four years. Assessors shall have reached the age of 25 at the time of the proposal and shall have worked in a department of their occupational group for a total of at least three years.

(2) At the beginning of the term of office of the Board, the Occupational Accident Insurance Fund shall prepare a list for each of the occupational groups below:

1. masters and ships’ officers of the deck department;
2. ratings of the deck department;
3. ships’ officers of the technical department;
4. ratings of the technical department;
5. personnel of the other departments.

The Chair shall consult the assessor from the occupational group of the appellant in accordance with the order of the list.

(3) The Chair shall head the Board of Appeal proceedings. He or she shall set the date for an oral hearing.

(4) The medical assessor shall not have conducted the examination on whose result the appeal is based him- or herself.

(5) The assessors from the occupational group of the appellant shall receive compensation by application, mutatis mutandis, of the Judicial Remuneration and Compensation Act.

(6) The members of the Board of Appeal shall be obliged to maintain confidentiality with respect to the information about the personal situation of the appellant that comes to their knowledge in the performance of their duties.

Section 9
Authorization of physicians
(1) The physician shall be considered to have the professional knowledge required for the authorization in accordance with Section 16 of the Maritime Labour Act if he or she:

1. is recognized as general medical practitioner, anaesthesiologist, occupational physician, surgeon or internist;
2. is able to assess the colour vision of the person to be examined;
3. provides evidence of at least four weeks of practical experience on a seagoing ship and comprehensive knowledge of the health-related requirements of service on a ship;
4. provides evidence of having worked for at least four years in an in-patient or out-patient setting with a focus on the detection and treatment of diseases associated with service on board a ship;
5. has attended a seminar of the Maritime Medical Service providing an introduction to the basics of the examination of fitness for service at sea; and
6. ensures that he or she is able to access the fitness for service at sea register for the purpose of examinations of fitness for service at sea.

(2) A physician shall be considered to lack the personal suitability in particular if he or she does not have at his or her disposal the equipment necessary to conduct the examination.

(3) A physician shall be considered to lack the required reliability in particular if he or she has grossly or repeatedly violated the provisions on the determination of the fitness for service at sea or professional regulations.

(4) The Occupational Accident Insurance Fund shall provide every authorized physician with a stamp of authorization in accordance with the model in Annex 3.

(5) The Occupational Accident Insurance Fund shall publish on its website a list of the physicians it has authorized that contains the information specified in the fourth sentence of Section 16(1) of the Maritime Labour Act.

Section 10
Extension of authorization

(1) On request, the authorization shall be extended for additional periods of three years if the prerequisites of Section 9(1)(1), (2) and (6), and subsection 2 are still fulfilled and the authorized physician provides evidence of having, after his or her authorization or the last extension of the authorization:

1. attended at least one training seminar of the Maritime Medical Service; and
2. regularly conducted examinations of fitness for service at sea.

The requirement of regular examinations of fitness for service at sea within the meaning of para. 2 of the first sentence shall, as a rule, be considered met if the authorized physician has conducted 300 examinations of fitness for service at sea within the validity period of the authorization.

(2) For a physician authorized for the first time in accordance with the first sentence of Section 16(2) of the Maritime Labour Act who applies for an extension of the authorization, subsection 1 shall apply with the requirement that 100 examinations of fitness for service at sea must have been conducted within one year after the granting of the authorization.

Section 11
Documentation obligations

(1) The authorized physician or the physician of the Maritime Medical Service shall record those findings of the examination of fitness for service at sea that are relevant to the determination of the fitness for service at sea and transmit the information specified in the second and third sentences of Section 19(6) of the Maritime Labour Act to the fitness for service at sea register without delay. The provisions of Section 630f of the German Civil Code shall remain unaffected.

(2) At the request of the examined person, the authorized physician shall, in accordance with Section 630g of the German Civil Code, give the person access, without delay, to the
examination documents that concern him or her and provide copies of the documents against reimbursement of the costs.

(3) Medical records on examinations of fitness for service at sea shall be kept for a period of ten years after completion of the examination, unless other regulations provide for longer retention periods for parts of the records. After expiry of the authorization, the physician shall keep the medical records and examination results or ensure that they are placed in proper safekeeping and that the Maritime Medical Service can access the documents for the purposes of Section 13(1) of the Maritime Labour Act; the first sentence shall apply mutatis mutandis.

Section 12
Access to fitness for service at sea register

(1) The data stored in accordance with Section 19(3) of the Maritime Labour Act may be made available, by way of an automated retrieval procedure, for the transmission of data from the fitness for service at sea register.

(2) The retrieval of data may only be performed using the personal details or the number of the certificate of fitness for service at sea.

(3) The transmitting agency may only allow the retrieval of data by way of an automated retrieval procedure from the fitness for service at sea register in accordance with Section 19 of the Maritime Labour Act if such retrieval is performed using:

1. the username of a user who is authorized to retrieve data; and
2. a password.

A user within the meaning of para. 1 of the first sentence can be a natural or a legal person. If the user within the meaning of para. 1 of the first sentence is not a natural person, the user shall ensure that the natural person retrieving the data can be identified for every retrieval performed. The user or the person retrieving the data shall choose a personal password prior to the first retrieval and change this password at the latest after expiry of the periods specified by the transmitting agency.

(4) The transmitting agency shall ensure, by means of an automated procedure, that no further retrievals are possible once the username in accordance with para. 1 of the first sentence of subsection 3 or the password has been transmitted incorrectly more than three consecutive times. The retrieving agency shall take measures to prevent the unauthorized use of the retrieval system.

Subchapter 2
Requirements to be fulfilled by specific groups of persons

Section 13
Fitness for service at sea requirements to be fulfilled by canal helmsmen

(1) A helmsmen on the Kiel Canal shall be considered to be fit for service at sea as required in accordance with Section 11 in conjunction with the third sentence of Section 3(4) of the Maritime Labour Act if he or she fulfils:

1. the health requirements for the deck department specified in Annex 1; and
2. the visual acuity requirements in accordance with subsection 2.

(2) With a view to ruling out night blindness, the mesopic vision shall, as a minimum, fulfil the contrast setting 1:2 and, in the case of glare, the contrast setting 1:2.7. Evidence of compliance with this requirement shall be provided to the physician conducting the examination of fitness for service at sea by presenting a medical certificate issued by an eye specialist.

(3) By derogation from Section 6 and Annex 1, no. 6.2, the fitness for service at sea of a canal helmsman may only be limited in terms of duration and trading area.
Chapter 3
Medical care

Subchapter 1
Delivery of medical care

Section 14
Internal controls

(1) The shipowner shall ensure, within the framework of the internal controls of the medical equipment in accordance with the second sentence of Section 109(3) of the Maritime Labour Act that the participating public pharmacy carries out the necessary replenishing of the medical equipment with medicines, medical devices and aids, as well as their sorting, on board the ship. This shall not apply if the ship is in a foreign port or if a medicine cabinet is not mandatory.

(2) If medicines are procured abroad, this shall be done with the participation of the pharmacy mentioned in the second sentence of Section 109(3) of the Maritime Labour Act.

Subchapter 2
Medical refresher courses

Section 15
Obligation to attend medical refresher courses

(1) Masters and ships' officers commissioned in accordance with the second sentence of Section 109(1) of the Maritime Labour Act working on board

1. ships engaged in worldwide trade,

2. ships in the trading area specified in Section 46(1) of the Maritime Labour Act (European trading area),

3. fishing vessels engaged in large-scale deep-sea fishing and in small-scale deep-sea fishing

shall have to undergo further training every five years by attending a medical refresher course (training course) with a duration of 40 teaching hours (advanced training course) accredited by the Occupational Accident Insurance Fund.

(2) Masters and ships' officers commissioned in accordance with the second sentence of Section 109(1) of the Maritime Labour Act working on board ships that do not meet the requirements of subsection 1 shall have to undergo further training every five years by attending a training course with a duration of 16 teaching hours (basic training course).

Section 16
Accreditation of training courses

(1) A training course shall be accredited by the Occupational Accident Insurance Fund on application if:

1. it covers the contents specified in Annex 4;

2. the provider of the training course (provider) has at its disposal an adequate number of persons with professional expertise for the practical and theoretical conduct of the training course;

3. the provider is independent and reliable and thus ensures the proper execution of its tasks; and

4. the provider has at its disposal suitable course rooms and medical equipment for the conduct of the training course in accordance with Annex 5.
(2) For the accreditation, the provider shall have to present the licences to practise and evidence of the completed training as nurse or emergency medical technician or paramedic for the persons conducting the training course.

(3) The accreditation period for a training course shall be limited to five years. Ancillary requirements may, also subsequently, be attached to the accreditation.

(4) On application, the accreditation of a training course shall be extended by additional five-year periods if the prerequisites of subsection 1 are still fulfilled.

(5) The accreditation shall be withdrawn if the provider has obtained it:

1. by way of intentional deception, threat or bribery; or
2. intentionally or with gross negligence by providing information that was, in substantial respects, incorrect or incomplete.

The accreditation shall be revoked if the provider no longer possesses the necessary professional knowledge, the required independence or reliability. Sections 48 and 49 of the Administrative Procedures Act shall remain unaffected.

Section 17
Monitoring of providers

(1) Providers are subject to monitoring by the Occupational Accident Insurance Fund. For this purpose, the staff of the Occupational Accident Insurance Fund shall be authorized, in particular, to:

1. enter the premises and the training rooms during the regular working hours of the provider and inspect its equipment, in particular its medical equipment;
2. verify the qualification of the teaching staff on the basis of appropriate evidence;
3. inspect and review the teaching materials and the curriculum of the training courses;
4. request information on the conducted training courses;
5. be present when training courses are conducted.

(2) The provider shall be obliged to accept the measures in accordance with subsection 1.

(3) Every training course shall, at its end, be evaluated in writing and anonymously by the participants with regard to the way it was conducted and the quality of the transfer of knowledge. The provider shall ensure that the completed evaluation forms are transmitted to the Occupational Accident Insurance Fund at the latter's request within no more than four weeks after the end of the training course.

(4) For purposes of verifying that the required teaching contents are transferred by the provider, the Occupational Accident Insurance Fund shall be authorized to make inquiries with course participants, on a random basis, by way of anonymised questionnaires at the end of a training course.

Section 18
Contents and conduct of training courses

(1) The theoretical part of the training course shall be conducted by a physician. By derogation from the first sentence, it shall also be permitted that nurses, emergency technical assistants or paramedics conduct the practical part of the training course in accordance with Annex 4. The practical part of the training course encompasses practical exercises in groups, the demonstration of medical equipment and case examples.

(2) The transfer of the training course contents shall be based on the latest medical knowledge within the meaning of the fourth sentence of Section 107(2) of the Maritime Labour Act.

(3) The training courses may be conducted in English.

(4) The maximum number of participants per training courses shall be 18.
(5) Upon completion of the training course, the provider shall provide every participant with a certificate of attendance.

**Subchapter 3**

**Ships’ doctors**

**Section 19**

**Registration of ships’ doctors**

(1) The shipowner shall ensure that only crew members who have been registered by the Occupational Accident Insurance Fund for this purpose work as ships’ doctors on board its ship.

(2) The Occupational Accident Insurance Fund shall, on application, register a person as ship’s doctor if he or she provides it with the following evidence:

1. presentation of the licence to practise medicine;
2. evidence of the recognition as general medical practitioner, anaesthesiologist, surgeon or internist;
3. evidence of additional qualification in “emergency medicine” or certificate of competence in “rescue medicine”;
4. evidence of a minimum of four weeks of practical experience on board a seagoing ship and of comprehensive knowledge of the health requirements for service on board a ship;
5. evidence that the person will be or is working on a merchant vessel flying the German flag as a ship’s doctor, in particular in the form of a seafarers’ employment agreement in accordance with Section 28 of the Maritime Labour Act.

(3) The Occupational Accident Insurance Fund shall issue a certificate confirming the registration as a ship’s doctor.

(4) The registration shall be withdrawn if the physician obtained the registration:

1. by way of intentional deception, threat or bribery; or
2. intentionally or with gross negligence by providing information that was, in substantial respects, incorrect or incomplete.

The registration shall be revoked if the prerequisites of subsection 2 are no longer fulfilled.

**Chapter 4**

**Transitional and final provisions**

**Section 20**

**Models**

The Occupational Accident Insurance Fund shall publish models of the certificates, confirmations and forms provided for in these Regulations in the Federal Ministry of Transport Gazette or the Federal Gazette.

**Section 21**

**Transitional arrangement for provisionally authorized physicians**

A physician who is provisionally authorized in accordance with the first sentence of Section 153 of the Maritime Labour Act shall, by derogation from para. 1 of the first sentence of Section 9(1) not have to be recognized as a specialist provided he or she has conducted a minimum of 300 examinations of fitness for service at sea since 1 January 2010 and has attended a minimum of one training seminar of the Maritime Medical Service while working as a physician.
Section 22
Transitional arrangement for training courses
Training courses recognized under previous legislation on 21 August 2014 shall be deemed provisionally accredited in accordance with Section 16(1). The provisional accreditation shall become invalid:

1. unless an application for accreditation is submitted by 1 August 2015; or
2. in the event that the application was submitted in time, once the decision on the application has become non-appealable.

Annex 1
(re Section 3 and Section 13(1)(1) and subsection 3)
Fitness for service at sea requirements

Table of contents

1. General principle
2. Vision standards
2.1 Vision standards by department
2.2 Visual correction
2.3 Vision standards following laser treatment
3. Hearing standards
3.1 Deck department
3.2 Technical department and electro-technical department
3.3 Catering department and other services
3.4 Hearing aids
4. Physical capacity requirements
4.1 Criteria for physical capabilities assessment
4.2 Required physical capabilities
5. Fitness criteria for medication use
5.1 General principle
5.2 Medications that can affect the performance of routine and emergency duties
5.3 Medications that can have severe or serious consequences if taken at sea
5.4 Medications that lead to a limitation of fitness for service at sea
5.5 Medications that lead to a lack of fitness for service at sea
6. Fitness standards for health disorders
6.1 Concretization of the amount of discretion
6.2 Table providing an overview of conditions
7. Exclusion criteria for fitness for service at sea
7.1 Excessive BMI
7.2 Gastrointestinal infection for catering department
7.3 Physical, mental and emotional disorders leading to impaired performance
7.4 Acute coronary syndrome (e.g. myocardial infarction), aortocoronary bypass grafting, heart valve surgery

1. General principle
A person shall be fit for service at sea within the meaning of Section 11 of the Maritime Labour Act if:

1. the person's vision is adequate;
2. the person's hearing is adequate;
3. the person's physical capabilities are adequate;
4. the person's physical and mental capabilities are not significantly impaired despite regular use of medication;
5. the person's physical and mental capabilities are not significantly impaired despite existing health disorders;
6. none of the exclusion criteria for the person's fitness for service at sea applies.

2. Vision standards
2.1 Vision standards by department

Notes:

1. Values given in Snellen or an equivalent system in decimal notation.
2. Determination of values using the reading test procedure. A hyperopia shall neither exceed plus 5.0 dioptres spherical nor plus 3.0 dioptres cylindrical.
3. As defined in the International Recommendations for Colour Vision Requirements for Transport by the International Commission on Illumination (CIE 143-2010, including any subsequent versions).
4. Where initial examination findings indicate limitations, the person to be examined shall be additionally examined by an eye specialist.
5. CIE colour vision standard 1.
6. Personnel of the categories “technical department”, “electro-technical department”, “catering department” and “other services” shall be required to have a combined eyesight vision of at least 0.4.
7. CIE colour vision standard 1, 2 or 3.
All crew members shall be required to achieve a minimum eyesight standard of 0.1 unaided in each eye (STCW Code, section B-I/9, paragraph 10).

2.2 **Visual correction**

If the required eyesight standard in accordance with no. 1.1 is achieved only with glasses or contact lenses, the requirement to wear the glasses or contact lenses at all times during service and to carry replacement glasses or replacement lenses on board the ship shall be imposed on the examined person.

2.3 **Vision standards following laser treatment**

If laser refractive surgery has been undertaken, recovery should have been completed and the quality of visual performance, including contrast, glare sensitivity and the quality of night vision, should have been checked by an eye specialist.

3 **Hearing standards**

3.1 **Deck department**

Crew members in the deck department shall be required to understand, with each ear, whispered speech without hearing aid at a distance of 3 metres with the ear facing in the direction of the examiner or, at a distance of 1 metre, with the worse ear and, at a distance of 5 metres, with the better ear. Speech at normal volume shall have to be understood at a distance of 5 metres with each ear with the ear facing in the direction of the examiner.

If it becomes clear during an examination of fitness for service at sea that the hearing of a serving crew member of the technical department or the electro-technical department has deteriorated compared with the previous examination of fitness for service at sea, the crew member shall remain fit for service at sea only if, based on the results of the audiometry, it is not to be expected that the machine noise will pose an increased risk to the ears.

3.2 **Technical department and electro-technical department**

Crew members of the technical service and the electro-technical service shall be required to understand, without hearing aid, speech at normal volume with both ears at the same time at a distance of 3 metres with the face turned away from the examiner.

3.3 **Catering department and other services**

Crew members in the catering department and in other services shall be required to understand speech at normal volume with both ears at the same time at a distance of 3 metres with the face turned away from the examiner.

3.4 **Hearing aids**

Crew members of the deck department, the technical department and the electro-technical department shall not be allowed to use hearing aids. Crew members of the catering department and other services shall be allowed to use hearing aids if they:

1. can safely and efficiently carry out their duties on board during the validity period of the certificate of fitness for service at sea;
2. are capable of reliably hearing an emergency alarm at any time (day and night).
If a hearing aid is used, a replacement hearing aid and batteries in sufficient quantity as well as other needed consumables shall be kept on board the ship.

4. **Physical capacity requirements**

4.1 **Criteria for physical capabilities assessment**

The authorized physician or the physician of the Maritime Medical Service shall take into account the following criteria when assessing the physical capabilities of the person to be examined:

- strength;
- stamina;
- flexibility;
- balance and coordination;
- compatibility of body measurements with entering and staying in confined spaces;
- ability to cope with stress (cardiac and respiratory reserve); and
- fitness for specific tasks, e.g. wearing of a breathing apparatus.

4.2 **Required physical capabilities**

The examined person shall be considered to have the physical capacity required for the fitness for service at sea if he or she possesses the following physical capabilities:

<table>
<thead>
<tr>
<th>Shipboard task, function, event or condition</th>
<th>Related physical capability</th>
<th>A medical examiner should be satisfied that the candidate:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Routine movement around vessel:</td>
<td>Maintain balance and move with agility</td>
<td></td>
</tr>
<tr>
<td>– on moving deck</td>
<td>Climb up and down vertical ladders and stairways</td>
<td></td>
</tr>
<tr>
<td>– between levels</td>
<td>Step over coamings (e.g. Load Line Convention requires coamings to be 600 mm high)</td>
<td></td>
</tr>
<tr>
<td>– between compartments</td>
<td>Open and close watertight doors</td>
<td></td>
</tr>
</tbody>
</table>

has no disturbance in sense of balance

does not have any impairment or disease that prevents relevant movements and physical activities is, without assistance (without the use of another person), able to:

– climb vertical ladders and stairways
– step over high sills
– manipulate door closing systems
Routine tasks on board:
- use of hand tools
- movement of ship's stores
- overhead work
- valve operation
- standing during a four-hour watch
- working in confined spaces
- responding to alarms, warnings and instructions
- verbal communication

| Strength, dexterity and stamina to manipulate mechanical devices |
| Lift, pull and carry a load (e.g. 18 kg) |
| Reach upwards |
| Stand, walk and remain alert for an extended period |
| Work in confined spaces and move through restricted openings (e.g. SOLAS regulation 11-I/3-6.5.1 requires openings in cargo spaces and emergency escapes to have the minimum dimensions of 600 mm x 600 mm) |
| Visually distinguish objects, shapes and signals |
| Hear warnings and instructions |
| Ability to express him- or herself orally in a clear manner |
| does not have a defined impairment or diagnosed medical condition that reduces ability to perform routine duties essential to the safety of the vessel: |
| - can work with arms raised |
| - can stand and walk for an extended period |
| - can enter confined spaces |
| - fulfils the eyesight standards (table A-I/9) |
| - fulfils hearing standards set by a competent authority or the corresponding international guidelines in this regard |
| - can hold normal conversation |

Emergency duties on board:
- escape
- fire-fighting
- evacuation

Don a lifejacket or immersion suit
Escape from smoke-filled spaces
Take part in fire-fighting duties, including use of breathing apparatus
Take part in vessel evacuation procedures

| does not have a defined impairment or diagnosed medical condition that reduces ability to perform emergency duties essential to the safety of the vessel: |
| - can don a lifejacket or immersion suit |
| - can crawl |
| - can feel for differences in temperature |
| - can handle fire-fighting equipment |
| - can wear breathing apparatus (where required as part of duties) |

5. Fitness criteria for medication use

5.1. General principle

Certain types of medication can limit the fitness for service at sea or even lead to a lack of fitness for service at sea. The following statements refer exclusively to the use of medication by the person to be examined that has been prescribed for an extended period of time or permanently.

5.2. Medications that can affect the performance of routine and emergency duties
For the following medications, the authorized physician shall decide on a case-by-case basis whether the person to be examined is fit for service at sea or only fit for service at sea with limitations:

1. Medications affecting the central nervous system functions, e.g. sleeping tablets, antipsychotics, some analgesics, some anxiolytics and antidepressants and some antihistamines.

2. Agents that increase the likelihood of sudden debility or even unconsciousness, e.g. insulin, some of the older anti-hypertensives and medications predisposing to seizures.

3. Medication impairing vision, e.g. hyoscine and atropine.

5.3 Medications that can have severe or serious consequences if taken at sea

For the following medications, the authorized physician shall decide on a case-by-case basis whether the person to be examined is fit for service at sea or only fit for service at sea with limitations:

1. Bleeding from injury or spontaneously, e.g. under warfarin. In this case, a case-by-case assessment of the probability of occurrence (risk of bleeding) shall be required. Anticoagulants, such as warfarin or dicoumarin, normally have a likelihood of complications that is incompatible with service at sea. However, if coagulation values are stable and closely monitored, work that does not carry an increased likelihood of injury and that takes place near onshore medical facilities may be permitted.

2. Dangers resulting from cessation of medication use, e.g. metabolic replacement hormones including insulin, anti-epileptics, anti-hypertensives and oral anti-diabetics.

3. Antibiotics and other anti-infective agents.

5. Medications supplied for use at individual discretion (asthma treatments and antibiotics for recurrent infections).

5.4 Medications that lead to a limitation of fitness for service at sea

a) Limitation of the period of validity of the certificate of fitness for service at sea

By derogation from the second sentence of Section 12(5) of the Maritime Labour Act, the authorized physician or the physician of the Maritime Medical Service shall specify a shorter validity period in the certificate of fitness for service at sea if the monitoring of the effectiveness of the medication or of its adverse effects has to take place at shorter intervals than the regular validity period (cf. information provided for the relevant conditions in the table in no. 6).

b) Geographical restriction of the activities of crew members on board

The authorized physician or the physician of the Maritime Medical Service shall restrict, in the certificate of fitness for service at sea, the activities of a crew member on board to a certain trading area if the adverse effects of a relevant medication only develop slowly, thus ensuring access to adequate medical care if the ship only operates near coastal waters.
c) Limitation of deployment duration of crew members on board

The authorized physician or the physician of the Maritime Medical Service shall limit, in the certificate of fitness for service at sea, the deployment duration of a crew member on board if a medication, e.g. anti-diabetics, anti-hypertensives or hormone replacement therapies, requires frequent monitoring.

5.5 Medications that lead to a lack of fitness for service at sea

The following medications lead to a lack of fitness for service at sea:

1. oral medication which, if not taken due to nausea or vomiting, can have life-threatening consequences;
2. evidence of risk that correct use can result in cognitive impairment;
3. reliable evidence of serious adverse effects that may be dangerous at sea, e.g. anticoagulants; and
4. any medication that, based on reliable scientific findings and in accordance with the assessment of the authorized physician, leads to severe and impairing adverse effects.

6. Fitness standards for health disorders

6.1 Concretization of the amount of discretion

The following table contains a list of typical conditions. The amount of discretion the authorized physician has when assessing the fitness for service at sea is concretized on the basis of this table. Here, it should be taken into account that fitness for service at sea with limitations is the exception. Crew members have to be fit to act in emergencies, not least to save themselves. Health impairments must not result in a risk to other crew members or the safety of the ship.

6.2 Table providing an overview of conditions

The table below is structured as follows:

- Column 1: WHO International Statistical Classification of Diseases and Related Health Problems, 10th revision (ICD-10). Codes are listed as an aid in the analysis and, in particular, for the international collection and compilation of data.
- Column 2: The common name of the condition or group of conditions, with a brief statement on its relevance to work at sea.
- Column 3: Lack of fitness for service at sea or limitation of the validity period of the certificate of fitness for service at sea.
- Column 4: Limitation of fitness for service at sea.
  
  This column shall be used in the assessment of the fitness for service at sea if the person to be examined does not fulfill the criteria of column 3.
- Column 5: Conditions under which the person to be examined is likely to meet the requirements for service on board in the intended department.
  
  This column shall be used for the assessment of the fitness for service at sea if the person to be examined does not meet the requirements of column 3 or 4.
For some conditions, one or more columns are either not relevant or not a suitable assessment category. Such cases are marked with the words “not applicable”.

**Limitations** regarding fitness for service at sea:

T = “temporary”: condition is expected to be temporary (less than two years)
crew member is normally unfit for service at sea.

P = “permanent”: condition is expected to be permanent (more than two years)
crew member is normally unfit for service at sea.

R = “restricted”: restrictions are as follows:

1. type of activity: able to perform some but not all routine and emergency duties on board without causing others to have additional duties or more responsibilities;

or

2. trading area: the crew member is at an increased risk of suffering serious harm if working under certain climatic conditions or at a great distance from onshore medical care.

The crew member's fitness for service at sea is subject to restrictions with respect to the type of activity or the trading area.

L = “limited”: due to his or her health condition, the crew member has to be examined more often than every two years.

A time limit is imposed on the validity period of the certificate of fitness for service at sea.

</tbody>
</table>

**Footnote 1:** Decisions shall be in conformity with national practice and legislation (e.g. in Germany, the Act on the Protection of Working Mothers). The pregnancy should be declared at an early stage so that national recommendations on antenatal care and screening can be followed.

**Notes:**

* Recurrence rates: Where the terms very low, low and moderate are used for the likelihood of a recurrence. These are essentially clinical judgements but, for some conditions, quantitative evidence on the likelihood of recurrence is available. Where this is available, e.g. for seizure and cardiac events, it may indicate the need for additional investigations to determine an individual's likelihood of a recurrence.

Quantitative recurrence levels approximate to:

- Very low: recurrence rate less than 2 per cent per year;
- Low: recurrence rate 2–5 per cent per year;
- Moderate: recurrence rate 5–20 per cent per year.

** Asthma severity definitions:

**Childhood asthma:**
- Mild: Onset age > 10 years, few or no hospitalizations, normal activities between episodes, controlled by inhaler therapy alone, remission by age 16, normal lung function.
- Moderate: Few hospitalizations, frequent use of reliever inhaler between episodes, interference with normal exercise activity, remission by age 16, normal lung function.
- Severe: Frequent episodes requiring treatment to be made more intensive, regular hospitalization, frequent oral or IV steroid use, lost schooling, abnormal lung function.

**Adult asthma:**
Asthma may persist from childhood or start over the age of 16. There is a wide range of intrinsic and external causes for asthma developing in adult life. In late-entry recruits with a history of adult onset asthma, the role of specific allergens, including those causing occupational asthma, should be investigated. Less specific inducers such as cold, exercise and respiratory infection also need to be considered. All can affect fitness for service at sea.
- Mild intermittent asthma: Infrequent episodes of mild wheezing occurring less than once every two weeks, readily and rapidly relieved by beta agonist inhaler.
- Mild asthma: Frequent episodes of wheezing requiring use of beta agonist inhaler or the introduction of a corticosteroid inhaler. Taking regular inhaled steroids (or steroid/long-acting beta agonists) may effectively eliminate symptoms and the need for use of beta agonist treatment.
- Exercise-induced asthma: Episodes of wheezing and breathlessness provoked by exertion, especially in the cold. Episodes may be effectively treated by inhaled steroids (or steroid/long-acting beta agonist) or other oral medication.
- Moderate asthma: Frequent episodes of wheezing despite regular use of inhaled steroid (or steroid/long acting beta agonist) treatment requiring continued use of frequent beta agonist inhaler treatment, or the addition of other medication, occasional requirement for oral steroids.
- Severe asthma: Frequent episodes of wheezing and breathlessness, frequent hospitalization, frequent use of oral steroid treatment.

7. **Exclusion criteria for fitness for service at sea**

7.1 **Excessive BMI**
A person with a body mass index (BMI) of above 40 kg/m$^2$ is unfit for service at sea.

7.2 **Gastrointestinal infection for catering department**
Crew members of the catering department shall be considered unfit for service at sea if they are banned from working in accordance with Section 42 of the
Protection against Infection Act. Evidence shall have to be provided by way of stool testing that the person is not suffering from shigellosis or salmonellosis.

7.3 **Physical, mental and emotional disorders leading to impaired performance**

A physical, mental or emotional disorder leading to impaired performance shall rule out the fitness for service at sea if the disorder, according to the current state of medical science, would entail a functional impairment that may render the candidate incapable of reliably performing or impair his or her ability to perform the tasks and duties, in particular rescue and self-rescue in emergencies, associated with the concerned department for which the fitness for service at sea is to be established.

7.4 **Acute coronary syndrome (e.g. myocardial infarction), aortocoronary bypass grafting, heart valve surgery**

Following these health conditions/surgeries, a person shall be considered unfit for service at sea for at least one year.

**Annex 2**

(re Section 4(1))

**Conduct of examinations of fitness for service at sea**

1. **Questionnaire on state of health**

Prior to the examination of fitness for service at sea, the person to be examined shall complete a questionnaire regarding his or her state of health and previous diseases and sign it (second sentence of Section 4(1)). The authorized physician or the physician of the Maritime Medical Service shall take the knowledge gained through this questionnaire into account when assessing the fitness for service at sea.

If the person to be examined has not yet reached the age of 18 (adolescent), the questionnaire shall be:

1. completed by the adolescent's guardian;
2. signed by the adolescent's guardian and the adolescent; and
3. presented to the authorized physician prior to the conduct of the examination of fitness for service at sea.

2. **Scope of examination**

The scope of the examination of fitness for service at sea is based on the following table.

In the case of a pregnancy that the woman is aware of, the physician conducting the examination shall inform her of the particular risks to her and her child arising from service on a seagoing ship.

**II. Additional examinations**

(a) Deck department, electro-technical department

| Colour vision test | Assessment of colour vision using colour plates of two recognized systems | Included in no. 8 | N/A |

(b) Catering department

| Stool test | Stool test for salmonellae and shigellae | 4530 4538 | 1.1 5 1.1 5 |

(c) X-ray examination at the request of the Maritime Medical Service

| Chest X-ray | X-ray of the chest, 1 view PA | 5135 | 1.8 |

(d) Laboratory tests at the request of the Maritime Medical Service

| Laboratory tests | Laboratory blood tests | In accordance with the Medical Fees Schedule (GOÄ) item nos. of the section on laboratory tests | 1.1 5 |

3. **Vision testing**

3.1 **Vision test methods**

The test of the vision of the person to be examined shall be conducted by the authorized physician or the physician of the Maritime Medical Service:
1. using the Snellen or an equivalent test method (distance vision); and

2. using a reading test method (near vision).

### 3.2 Colour vision testing

Colour vision shall be tested using colour plates of two recognized systems (e.g. Ishihara colour plates, Stilling/Velhagen, Boström or equivalent plates). In cases of doubt, an examination by an eye specialist using an anomaloscope and a further colour vision test method shall have to indicate a normal trichromatic vision. The use of colour-correcting lenses leads to invalid test results and shall not be permitted.

### 3.3 Visual field test

Visual fields shall initially be assessed using confrontation tests (Donders, etc.). Any indication of limitations of the visual field or the presence of a medical condition where visual field loss can occur shall lead to a more detailed investigation.

### 3.4 Twilight and night vision test

Limitations to twilight and night vision may occur in specific eye diseases or may follow ophthalmological procedures. Such limitations can be detected when testing vision at low contrast values/twilight vision or by way of other tests/testing methods. Specialist assessment should be undertaken if reduced twilight vision is suspected.

### 4. Examination of hearing

#### 4.1 Whispered speech test

The authorized physician or the physician of the Maritime Medical Service shall examine hearing by whispering several sentences in the direction of the person to be examined from a certain distance and checking if the person to be examined has understood the contents of these sentences. Depending on the department, the person to be examined shall be required to understand the sentences with the ear that is facing in the direction of the physician or with both ears at the same time. Details are provided in Annex 1 of the Regulations.

#### 4.2 Audiometry for follow-up examinations

If it becomes clear in a follow-up examination that the hearing of a crew member of the technical or the electro-technical department has deteriorated, an examination by an ear specialist, including audiometry, shall be performed.

### 5. Examination of physical capacity

#### 5.1 Procedure for physical capabilities assessment

If the authorized physician or the physician of the Maritime Medical Service finds that the physical capacity of the person to be examined is limited, further tests shall be performed.

#### 5.2 Assessment of the results

The authorized physician or the physician of the Maritime Medical Service should assess the physical capacity results of the person to be examined based on the following criteria:
1. Is the crew member able to perform his or her routine and emergency duties efficiently?

2. Are there any limitations to his or her strength, flexibility, stamina or coordination?

3. Assessment of cardiopulmonary performance.

5.3 Decision-making

1. Are there any indications of limited physical and emotional fitness?
   
   (a) No – no further tests required.
   
   Result:
   
   Fit for service at sea: able to perform all duties within designated department.

   (b) Yes - conduct of further examinations, obtaining medical findings to verify the ability of the crew member to perform his or her routine and emergency duties.

   Do the examination results indicate that capabilities may be limited?
   
   (i) No.
   
   Result:
   
   Fit for service at sea: able to perform all duties within designated department.

   (ii) Yes - due to his or her health condition, the crew member has to be examined more often than every two years.

   Result:

   Fit for service at sea for a limited period of time (L-“Limited”): a limit is imposed on the validity period of the certificate of fitness for service at sea. Able to perform all duties within designated department within this period of time.

   (iii) Yes - the health condition of the crew member results in the following limitations:

   1. type of activity: able to perform some but not all routine and emergency duties on board without causing others to have additional duties or more responsibilities,

   or

   2. trading area: the crew member is at an increased risk of suffering serious harm if working under certain climatic conditions or at a great distance from onshore medical care.

   Result:

   Fit for service at sea with restrictions (R-“Restricted”): restrictions regarding the type of activity and the trading area shall be entered into the certificate of fitness for service at sea.

   (iv) Yes - however, the cause of the limitations can be eliminated.
Result:

Unfit for service at sea (T - “Temporary”): expected to be temporary, i.e. less than two years.

(v) Yes - however, the cause of the limitations cannot be eliminated.

Result:

Unfit for service at sea (P - “Permanent”): expected to be permanent, i.e. more than two years.

Footnote 2: In accordance with Section 1626 of the German Civil Code, guardians are, among others, the parents of the adolescent.

Annex 3
(re Section 5(1)(2) and Section 9(4))
Models of authorization stamps

The authorization stamps shall have a diameter of 3 cm.

(a) Authorization stamps for certificates of fitness for service at sea issued by physicians of the Maritime Medical Service

For every physician, the authorization stamp shall be marked with a consecutive number assigned to him or her.

(b) Authorization stamp for certificates of fitness for service at sea issued by authorized physicians

For every authorized physician, the authorization stamp shall be marked with a consecutive number assigned to him or her.

## Specific diseases

Learning objective: The master/officer treats the injury or disease appropriately. The treatment is in conformity with generally accepted medical practice as well as with the medical instructions (para. 3 of the second sentence of Section 107(2) of the Maritime Labour Act) published by the Occupational Accident Insurance Fund for Transport and Traffic (Maritime Medical Service) and the Medical First Aid Guide for Use in Accidents Involving Dangerous Goods (MFAG). Differentiation between minor health disorders and serious emergencies. Within the framework of the following section, the required basic anatomical and physiological knowledge as well as knowledge of the symptoms of injuries and diseases is to be transferred.
